SUMMARY

I'm a Full Stack Engineer proficient in Test Driven Development with JavaScript, React, HTML, CSS, Node.js, Express, and PostgreSQL. With over 10 years of experience in both UX Design and Development roles, I will bring a user focused perspective to your team.

SKILLS

Engineering: JavaScript, TypeScript, CSS3, HTML5, Git, Unit and Integration testing, A/B Testing, State Management, Continuous Integration/Continuous Deployment, Node.js, PostgreSQL, Express

Tools & Frameworks: React, Redux, Jest, Mocha, Chai, Webpack, Yarn/NPM, Emotion/Styled Components, NextJs, Jenkins, Babel, Three.js, Agile, VS Code

EXPERIENCE

NIKE | Beaverton, OR

Sr. Full Stack Engineer - ETW

June 2021 – Present

- Used TDD to deliver features through a Jenkins CI/CD pipeline for Nike By You's 2D & 3D shoe customization experience.
- Reduced development complexity by refactoring out thousands of lines of deprecated code within the experience's API layer.
- Improved code quality by standardizing testing by implementing the Jest test framework and TypeScript in the team's API project.

CAREMORE HEALTH | Cerritos, CA

Sr. User Experience Designer

August 2017 – June 2021

- Led user experience for the medical provider iOS app.
- Inspired systemic change in provider workflow, measured by an 85% reduction in documentation hours, by highlighting double documentation inefficiencies.
- Reduced dev team's time-to-market on new features by half, by creating a reusable component library.
- Mentored integrated UX team members through consistent feedback and support.

SUREID | Hillsboro, OR

User Experience Designer

April 2015 – May 2017

- Advised engineering teams on user experience best practices.
- Created applicant review app, reducing time to review by 50%, by employing usability best practices.
- Conducted and standardized usability testing on app features to drive user focused decision making.

DEALER SPIKE | Wilsonville, OR

Lead Front-End Developer

December 2010 – April 2015

- Drove creation of responsive components and views, giving the SaaS company a market advantage to grow it's dealership customer base by 970% during tenure.
- Mentored a team of five front-end developers creating a reduction in development time of customer sites from one week to two days.

EDUCATION

THINKFUL

Full Stack Engineering

May 2021

- Full stack software engineering with a focus on JavaScript Web Development.
- Practical mastery of JavaScript, React, Node.js, PostgreSQL, HTML, CSS, Deployment, Testing, and Version Control.
