SUMMARY

I'm a Full Stack Developer proficient in JavaScript, React, HTML, CSS, Node.js, Express, and PostgreSQL. With over 10 years of experience in both UX Design and Development roles, I bring a user focused perspective to your team.

SKILLS

Front End: JavaScript, React, NextJS, Three.js, Jest, Enzyme, CSS-in-JS, SCSS, CSS3, HTML5

Back End: Node.js, PostgreSQL, Express, Test Driven Development, Mocha, Chai, Deployment

Design: Rapid Prototyping, Usability Testing, Wireframing, Story Maps, User Flows

PROJECTS

Retrio | [Website](#): Developed a digital retrospective app for the traditionally in-person Agile ceremony.

- Promoted reusability by writing components and services throughout the client and server.
- Practiced test driven development resulting in an app under test.
- Stack: Node.js, PostgreSQL, Express, React, JavaScript, HTML, CSS, Mocha, Chai, Jest

Racking Up | [Website](#): Created a full stack app to manage clothing purchases.

- Created client and server applications with test coverage.
- Deployed server and client to Heroku and Vercel.
- Stack: Node.js, PostgreSQL, Express, React, JavaScript, HTML, CSS, Mocha, Chai, Jest

EXPERIENCE

CAREMORE HEALTH | Remote

Sr. User Experience Designer

August 2017 – Present

- Led user experience for provider medical iOS app.
- Inspired systemic change in provider workflow, measured by an 85% reduction in documentation hours, by highlighting double documentation inefficiencies.
- Reduced dev team's time-to-market on new features by half, by creating a reusable component library.
- Mentored integrated UX team members through consistent feedback and support.

SUREID | Hillsboro, OR

User Experience Designer

April 2015 – May 2017

- Advised engineering teams on user experience best practices.
- Created applicant review app, reducing time to review by 50%, by employing usability best practices.
- Conducted and standardized usability testing on app features to drive user focused decision making.

DEALER SPIKE | Lake Oswego, OR

Lead Front-End Developer

December 2010 – April 2015

- Drove creation of responsive components and views, giving the SaaS company a market advantage to grow it's dealership customer base by 970%.
- Mentored a team of five front-end developers creating a reduction in development time of customer sites from one week to two days.

EDUCATION

THINKFUL

Full Stack Engineering

May 2021

- Full stack software engineering with focus on JavaScript Web Development.
- Practical mastery of JavaScript, React, Node.js, PostgreSQL, HTML, CSS, Deployment, Testing, and Version Control.
